Suparek Borwornpinyo graduated from Chiangmai University with B.Sc. in Animal Science in 1995. He earned his M.Sc. in 2000 and Ph.D. in 2006 from North Carolina State University, Raleigh, USA in the area of specialization in the production of transgenic chickens to express bacterial beta-galactosidase and the subsequent utilization of lactose as a feed stuff. During 2010 -2011, he, as a visiting scientist, had been trained in cell and gene therapy for beta-thalassemia at the Institut des Maladies Emergentes et des Thérapies Innovantes, CEA de Fontenay aux Roses, France. He serves as a full-time lecturer in the Department of Biotechnology, Faculty of Science, Mahidol University and

a scientific consultant in cell and gene therapy unit, Ramathibodi Hospital Research Center, Faculty of Medicine, Ramathibodi Hospital, Bangkok. In 2015, he led a group of scientists and physicians in the field of drug development to establish Excellent Center for Drug Discovery (ECDD) in the cooperation among TCELS, Faculty of Science and Faculty of Medicine, Ramathibodi Hospital, Mahidol University. Now, he serves as a co-director of ECDD.
