MUSC Promotes ECDD as an Outstanding Center for further Multi-organization Collaboration Feasibility

25 January 2018 – at the Faculty of Science, Phayathai Campus Chalermprakiat Building, MUSC organized a joint discussion on research feasibility regarding the intensive horticulture and collaboration between the representative from Chiba University, Japan and MUSC's key administrators.

The visit to MUSC's Excellent Center for Drug Discovery (ECDD), Faculty of Science, Mahidol University was also organized for the representative from Chiba University. ECDD currently becomes an important center in promoting multi-organization collaborations to develop the tools specifically for understanding the biopharmaceutical process, molecular basis, and gene therapies. The operating center equipped with high throughput and high content screening (HTS/HCS) automation provides the research community with cost-advantage, high-technology instrumentation, and services. ECDD nowadays is playing a key role in accommodating international researchers, visitors, and collaborators those who are seeking for the new possible collaborations and discussion. Researchers from Chiba University, Japan were one among our international visitors, have visited this center on last 25th January 2018. A fruitful discussion has been done during the visit.
