

Proper Mask-Wearing

Reduces the Risk of COVID-19 Infection

**Wear 2 layers
of a mask**

for a better protection
from COVID-19

1st Layer (inner)

Use a mask that contains filters

2nd Layer (outer)

Cover with a cloth mask

Always keep masks fit closely over your face,
and avoid touching eyes, nose and mouth with your hands.

Caution

If you feel uncomfortable breathing, headache, dizzy, drowsy,
or need to keep touching the masks while wearing 2 layers,
we would recommend you to stop double-wearing.

**Although you are wearing masks,
physical distancing is still a must.**
